Re: **Mold Designer of the Year – Mold Making and Mold Design Division of SPE 2013**

Dear Tim:

It is with great pleasure that I am writing you today. As of 31-May-2013, you have been selected as the 2013 Mold Designer of the Year for the Mold Making and Mold Design Division of SPE. Congratulations on a job well done and on receiving the recognition of your peers in industry.

Each year the board of directors of the Moldmaking and Mold Design Division of the Society of Plastics Engineers selects from its membership, and from nominations at large, that one individual who exemplifies the role of Mold Designer. This person has shown through years of service to the industry his/her ability to grasp information, adapt to changing technology and provide career and technical guidance to those in subordinate roles. Additionally they have been willing to serve their craft by sharing information and experiences on a wide range of topics.

In 2013 your name joins the ranks of other industry leaders that have been awarded this distinction in years past.

Along with this award an honorarium will be presented to the school of your choosing in the amount of \$500.00. This honorarium is made possible through a generous donation from:  
Progressive Components Inc. located in Wauconda, Illinois.

This year we have a special event planned at the Amerimold 2013 conference in Rosemont, Illinois and we request the honor of your presence. Our hope is that you will attend so that we can present the award to you in person. The conference is being held for two days June 12 & 13. The Mold Making and Mold Design Division is sponsoring and presenting a half day session the morning of June 12<sup>th</sup> on the Engineering of molds. We have arranged to have members of the press available for personal interviews and photographs.

Again Tim, thank you for your dedication to our industry and for being a great leader and role model. We congratulate you on this award and wish you many more years of success in your endeavors.

Sincerely

Scott L. Peters  
Chair – Mold Making and Mold Design Division, the Society of Plastics Engineers, Inc.  
2012 – 2014
